

Roach Treatment Preparation sheet

Step 1. Remove dishes, food items, boxes, and all items from kitchen cabinets.

Step 2. Vacuum any crumbs or debris from cabinets

Step 3. Remove items from kitchen counter tops

Step 4. Have perimeter of all rooms accessible to be treated.

Step 5. Remove items from under kitchen vanity and medicine cabinet

Please do not use DIY sprays. This may work as a repellent and can drive the roaches deeper into hiding. Below, please list any products that you have been using within the past 2 months for roaches so we can be sure to not use similar products as roaches are known to build a resistance to certain formulations and products.
